Happy semester, and go bears,

work, and the plethora of new work coming out of the director for the Smart Cities Research Center, which we this, we are finalizing the recruitment of our executive a few weeks we will receive confirmation of funding to we have defined a strategy with the DOE and hopefully in Idaho National Laboratory. Together, with these four labs, Laboratory, National Renewable Energy Laboratory and Alexey Pozdnukov have been working quite intensely with Energy, specific to the Smart Mobility Program. As part of budget increases from the state. I am also very excited over the next year, and could potentially result in long term email, this will hopefully result in a number of new and put forward in the last cycle. As indicated in a previous resulting from the budget change proposal we successfully Department of Finance in Sacramento to fund projects campuses, we have started working with the California Together, with the ITS leadership at the four the UC summer leading to new projects and directions for this fall. I also encourage you to look opportunity for us to see new research happening on this. For more information, see many of you at the seminar, which will be an this Fall: " The Timing of Land Redevelopment Around relationship between transportation, the built College of Environmental Design, and he is excited to you is Chancellor's Professor of City and Regional Entrepreneurship Program. One new face, which I hope will soon become familiar to and Learn2Launch, the Silicon Valley Innovation and Master of Engineering, the concurrent Master of City

HEADLINES

Daniel A. Rodriguez
ITS Berkeley Director's Letter

Dear Colleagues and Friends,

With the beginning of the academic year, we are excited to announce the addition of several new faculty members to our team. These individuals bring a wealth of expertise and diverse perspectives that will enrich our research and teaching programs.
