Dear Colleagues and Friends,

This has been an exciting month for ITS as we look ahead. There have been many opportunities that we can expand beyond our current programs. We are looking to see so many alumni, students, and friends who are excited to hear more about what we are all doing at ITS. Keep up the good work, and I look forward to seeing what they will do in the next several weeks.

McMahon will be reaching out to find representatives from ITS and its Centers to sit on the committee, which will plan and carry out events and activities to promote Science Technology Engineering and Math (STEM). With high and the culture remains inclusive and healthy. We are expanding our programs, hiring, and making sure that ITS can carry out our work and be available to those that need it.

In order to highlight a new program, ITS is holding the first annual “Conversations in STEM” career event on Saturday, March 16, 2019 from 10:30 a.m. – 1 p.m. in the Banatao Auditorium in partnership with ITS Berkeley. The event will highlight the NAE’s First Lego League competition after participating in earlier competition held at UC Berkeley and its local exploration camp for girls from the East Bay. They came to the event to see so many alumni, students, and friends that are excited to see what ITS is doing. I want to specifically call out members of the 2010-2012 Program who have been working with Self-e-Science since the beginning. Karen Trapenberg Frick has been working with Self-e-Science, and I want to thank all of the members of the committee!

As we spend time in our own classrooms, research labs, and offices, we are seeing the potential of what can be available to them in a lower setting.

In order to keep the momentum of the ITS Morale Committee, we are looking to see how we can get involved with high school mentor programs like the 2018-2019 program. This has been an exciting program because it helps make engineering during the event and Dean Tsu-Jae King Liu checks out the obstacle course with ITS Berkeley Director Alexandre Bayen at the NorCal First Lego League Championships on the UC Berkeley campus.

Dean Tsu-Jae King Liu and ITS Berkeley will be presenting at the Transportation Seminar on April 12, 2019 in 290 Hearst Memorial Mining Building. Join us for beverages and cookies at 3:30 p.m.

I want to specifically call out members of the 2010-2012 Program who have been working with Self-e-Science since the beginning. Karen Trapenberg Frick has been working with Self-e-Science, and I want to thank all of the members of the committee!

ITS Berkeley Director's Letter

Go Bears.
